

AEA Spring 2017 Reaction

Writing 2

Due _____

Directions:

Write a couple paragraphs (the reaction should at least be fifteen sentences long) on how to improve home safety during an earthquake. Do this from an engineering perspective. Address some current challenges and propose a solution. Your proposal is your thesis; underline your thesis statement. Consider possible negative aspects of your proposal and then explain why you still think your proposal is beneficial. Include at least one outside source (i.e. something from a scholarly source) as evidence for your proposal.
